

ONDK · ORDEN GLOBAL SECURITY TOKEN · PRE-SALE

BUY THE GOLD, OR BUY THE HOUSE.

ORIGEN, AUKA and AGKA are the metal. ONDK is the company that mines it - and that built the chain, the wallet, the identity layer and the exchange the whole ecosystem runs on.

The pre-sale is open at USD 2.10 to 2.15 per ONDK. On August 28, 2026 the token opens to public trading on Ordenex.

Board-declared price in force: USD 2.15 · minute JD-2026-08-16

This document: August 17, 2026

A SECURITY TOKEN. AN INVESTMENT, NOT A DEPOSIT. READ PAGE 6.

YOU ARE NOT BUYING A COIN.

YOU ARE BUYING THE COMPANY.

ONDK is the security token of Orden Global Corp. It represents participation in the business itself — not a currency, not a utility token, not a claim on a specific bar of metal. When the house grows, ONDK is the instrument that holds that growth.

And the house is already built. Not a roadmap — deployed, running, and yours to check:

ITS OWN LAYER 1 BLOCKCHAIN

Chain 8532 is Orden Global's. Not a contract rented on somebody else's network: the validators, the gas floor and the rules are the house's. Every ONDK movement is public at ordenscan.com.

VERIFIED IDENTITY, BUILT IN

Genesis ID carries KYC, KYB, AML screening and single sign-on across the whole ecosystem. It is what lets a regulated security token move at all — and most token projects do not have it.

A WALLET PEOPLE ALREADY USE

Veta Wallet holds ORIGEN, AUKA, AGKA and ONDK, sends and receives, and settles card and merchant payments through MyTokenPay. It is the front door for everything the house issues.

AN EXCHANGE AND A FIAT SIDE

Ordenex is the house's own exchange. AuCorp gives local-currency accounts in 21 currencies across Latin America, Canada and the euro — the road out to cash without leaving the ecosystem.

THE MINING BUSINESS UNDERNEATH

Orden Global is not a software company that discovered gold as a theme. The metal side is the origin of the house, and it is what the tokens are referenced to. ONDK is the instrument that holds participation in all of it at once — the mining operation, the chain, and the products above it.

TWENTY-FIVE MONTHS OF SIGNED RESOLUTIONS.

ONDK does not trade anywhere yet, so its price today is the one the Board of Directors sets by resolution. Every figure below has a minute number, a date and a signatory, and every one of them can be checked against the minute book.

DATE	USD	MINUTE	SIGNED BY
July 1, 2024	1.00	JD-2024-11	Board Secretary
December 1, 2024	1.50	JD-2024-12-01	Board Secretary
July 1, 2025	1.70	JD-2025-07-01	Board Secretary
January 1, 2026	2.10	JD-2026-01-01	Board Secretary
August 16, 2026	2.15	JD-2026-08-16	Board Secretary IN FORCE

WHAT A DECLARED PRICE IS - AND WHAT IT IS NOT

A declared price is the verifiable fact that the Board, on a given date, in a given minute, signed by a given officer, resolved to publish that figure. It is not a market price, it is not an independent valuation, and it does not predict what the token will trade at once the book opens. It also does not drift between resolutions: it stays flat at the last signed figure until the Board signs another.

FOUR STEPS.

The pre-sale is open now and closes when the market opens on August 28, 2026. Buying before then means buying at the Board-declared band rather than at whatever the market sets afterwards.

01 **Verify your identity in Genesis ID**

Mandatory, and not a rule of ours: it is what any anti-money-laundering regime requires of a regulated security. You do it once, from the Veta Wallet app, and it works across the whole ecosystem.

02 **Get your Veta Wallet ready**

This is where your ONDK will land. Write your twelve recovery words on paper and keep them off the phone. Without them, if you lose the device, nobody — including us — can give you back access.

03 **Reserve your allocation**

You will need your Genesis ID, the amount in US dollars you want to commit, and your Veta Wallet address.

[COMPLETE: purchase channel · minimum · maximum · size of the round · closing date]

04 **Pay, and receive your ONDK**

[COMPLETE: payment rails — transfer to the AuCorp account, AuCorp balance, or crypto. Include the account and the reference the buyer must use.]

Once payment is confirmed against the bank statement, your ONDK are credited to your wallet at the band price. That confirmation is done by a person today, so allow a few business hours.

THE BOOK OPENS.

On August 28, 2026 ONDK begins public trading on Ordenex, the ecosystem's own exchange. You sign in with the same Veta Wallet account — there is no second password.

BUY	Anyone verified can buy ONDK publicly, at whatever price the order book shows.
SELL	You can offer the ONDK you hold. An order rests in the book until someone takes it.
CASH OUT	Proceeds move to your AuCorp account in local currency — US dollars, lempiras, euros and eighteen more — and out to your bank.

THE ONE THING TO UNDERSTAND BEFORE YOU COMMIT

A sell order does not execute because you placed it. It executes when somebody on the other side buys it.

On August 28, 2026 the book opens. Buyers arrive on their own, or they do not. If you offer 1,000 ONDK at USD 2.15 and nobody wants to buy at that price, your order simply sits there. You can lower your price to find a buyer - and then you are not selling at 2.15 any more.

Cashing out needs two things: an open market, and someone buying. Only the first is in our hands.

We would rather you hear that from us now than discover it in September. Everything on the next page is written for the same reason.

WHAT WE WOULD RATHER TELL YOU OURSELVES.

In the pre-sale you cannot sell.

You are buying before a market exists. Between today and August 28, 2026 there is nowhere to sell ONDK — not because we restrict it, but because the other half of the trade does not exist yet. Your money is committed until the book opens. Commit only what you can leave still.

The market price can settle below 2.10.

The Board-declared price and the market price are two different things. Once the book opens, ONDK is worth what people pay for it — which can be more than 2.15 or less than 2.10. Buying the pre-sale band does not guarantee selling above it.

A new book is a thin book.

A market that has just opened has few participants. Expect days with little or no volume, and wide gaps between what sellers ask and what buyers offer. That is normal in a new order book, and it means selling in a hurry can be expensive.

This is an investment. You can lose money.

ONDK is a security token: participation in a real company, with a real mining business behind it, and with the risks any company carries. You can lose part or all of what you commit. There is no deposit insurance, no guaranteed return, and nobody will refund you if the business does not go the way it is expected to.

None of this is here because a lawyer asked for it. It is here because a buyer who understands it is a buyer who stays — and because the fastest way to lose a house's name is to let somebody find out afterwards.

BEFORE YOU ASK.

Where do I see my ONDK?

In your Veta Wallet, and in the public explorer at ordenscan.com. Every movement is on the chain and you can verify it without asking us for anything.

Can I transfer ONDK to someone else before August 28, 2026?

[COMPLETE: yes / no. If there is a lock-up, state it here with its exact term.]

What if I change my mind before the opening?

[COMPLETE: cancellation and refund policy — or say plainly that there is none.]

What are the fees?

[COMPLETE: pre-sale fee, and buy/sell fees on Ordenex.]

Can I buy from any country?

[COMPLETE: eligible and excluded jurisdictions. This is set by the regime the offering is made under, and it has to be said before anyone pays.]

What if I lose my phone?

Your twelve recovery words restore your wallet on another device. Without them, nothing can. Write them on paper and keep them somewhere safe.

BEWARE OF SCAMS

We will never ask you for your twelve recovery words, or for your password - not by chat, not by phone, not by email. Nobody at Orden Global ever will. If someone does, it is a scam.

LEGAL

ONDK is a SECURITY TOKEN. This is an offering of securities, not the sale of a consumer product or of a utility cryptocurrency.

[COMPLETE: issuing entity, jurisdiction of the offering, and the regime it is issued under.]

The USD 2.10-2.15 band is the price DECLARED BY THE BOARD OF DIRECTORS by resolution (minute JD-2026-08-16). It is not an independent valuation, not a market price, and not a forecast of any future price.

Nothing in this document is a promise of return. The historical figures shown are past Board resolutions and do not indicate future results.

The market opening on August 28, 2026 is a planned date. OPENING A MARKET DOES NOT CREATE LIQUIDITY: the ability to sell depends on buyers existing, which nobody guarantees.

AuCorp, which provides the local-currency accounts used to cash out, is a financial technology institution incorporated in Prospera ZEDE under FinTech Regulation A. It is NOT a licensed bank and balances are NOT covered by deposit insurance.

[COMPLETE: reference to the subscription agreement / terms the buyer signs.]
